

“The Knack”

1. The knack of folding a KinderKot comes at this moment, when you move your hand inwards pushing the rings down.

2. The two sets of rings in this hand now need to slide over each other.

3. The rings coming from one side need to slide under the rings coming from the other side.

“The Knack”

1. The right hand holds both sets of rings together.

2. With your thumb, push the left hand side rings under the right hand side rings.

3. Keep pushing until the left hand side rings slide all the way under the right hand side rings.

4. The KinderKot will now fold easily into its ring shape for storage by bringing both hands down.
